

KINDERGARTEN MEDICAL REQUIREMENTS

Welcome to Kindergarten! This will be an exciting, fun-filled year for you and your child. This is just a note to inform you of the requirements for students entering Kindergarten. In order to better serve your child, the school nurse will need the following:

1. Diphtheria, Pertussis, and Tetanus – A series of 4 or more doses, with the booster dose being given on or after the 4th birthday.
2. Oral Polio – A series of 3 doses or more with the booster dose being given on or after the 4th birthday.
3. Measles, Mumps, and Rubella – Two doses required
4. Hepatitis B – Three doses required
5. Varivax (Chickenpox) – One dose required
6. Lead Test – Required for all children ages 6 month to 6 years.
7. Diabetes screening – Questionnaire on exam form to be completed by the physician.
8. Dental Exam - Due by May 15th of the Kindergarten year
9. Vision Exam - Due by October 15th of the Kindergarten year
10. Physical Exam - Must be on the State of Illinois Child Health Examination form.

A complete list of immunizations and a physical exam must be turned in within one month of entry into Kindergarten. Also, please notify the school nurse of any significant health problems your child may have. If your child requires any medication, during school hours, we will need a doctor's order before it can be administered at school.

I look forward to serving your child during the next school year. If you should have any questions, please call me at 635-3831 Ext. 253.

Sincerely,

Sherry Semanek R.N.
